

Senior Research Scientist at Pelago Bioscience

We are looking for a postdoctoral scientist skilled in biochemistry, molecular biology or cell biology to join our R&D team. You have experience in running and developing state-of-the-art laboratory techniques in biochemistry, biomedicine or *in vitro* pharmaceutical R&D. The candidate we are seeking is curious and passionate about cell biology and protein signaling and take great pride in delivering accurate results. Experience from proteomics and biomarker discovery projects is highly desirable.

Requirements:

- Life Science relevant PhD: Biochemistry, Molecular and Cell Biology
- 3 years post graduate lab experience
- Present to large groups of people or deliver seminars internally as well as externally
- Work based in Pelago's laboratories in Solna

Responsibilities:

- Plan and execute development and validation of CETSA® assay formats
- Participate in projects and meetings for both customers and collaborators
- Analyze results and write customer as well as scientific reports
- Develop application notes and represent Pelago at scientific conferences
- Work closely with the laboratory staff and report to the CSO

At Pelago we take great pride in delivering high quality data. It is therefore important that you are a responsible and accurate experimentalist and that you can convey the results to a customer, your colleagues and collaborators through good communicative skills. In this role, we believe that it is important that you can act decisively and are an innovative problem solver.

We are a small but rapidly expanding company in need of dynamic and flexible staff. We currently have a dedicated and highly motivated team of 20 staff, most of whom work in our labs. We do more than 90% of our business outside Sweden therefore you need to be fluent in English but we

normally speak Swedish in the lab. The position offered is a permanent position (after a 6-month trial period) based at our laboratories in Solna, Sweden. If you would like to apply for this position please send your CV and a cover-letter to Daniel@pelagobio.com.
